

# Professional Learning

Actively enabling teacher and students to use technology effectively in the classroom

Teachers and students can both benefit from a customised program of professional learning workshops delivered by one of our Apple APLS Partners.

IRIS Computing aim is for schools to integrate current and future Apple technology deployments in a way that enhances curriculum delivery and excites students.

The Professional Learning team are all qualified classroom teachers with a passion for technology with years of experience in Education. They are accredited Apple Professional Learning Specialists which requires years of extensive training in the goal to provided amazing educational outcomes for schools.

Some courses include “Everyone Can Code” and “Everyone Can Create”.

Contact us to explore the Professional Learning courses we can provide.
