

# Testimonials

## St Virgil's College

*“When we look for a partner, we look for a provider who has knowledge and experience within the Education Industry and can provide service experiences that exceed our standards and with that we look to develop a long-term partnership with a visionary business that can add value to the operations of the College. The key to a successful partnership is a professional relationship founded upon strong, mutually respectful and honest communication therefore IRIS has been our preferred choice of supplier for our Apple Products and Device Repairs.*

*When we receive our devices from IRIS they are setup using Apple’s Device Enrollment Program which means each iPad becomes pre-enrolled into our MDM system allowing for a zero touch deployment from the ICT Team. This also allows us to focus our time on more critical start of year task*

*IRIS Provides a customer experience that is unprecedented in the managed services industry. For example our broken devices are picked up on-site by IRIS and the new devices returned in a timely fashion. This is a level of service which is unsurpassed to date.*

*Additionally IRIS provides a range of payment and financing options that gives us the flexibility when it comes to making sure we hit our financial targets.*

***Whether its devices, solutions, accessories or advise IRIS takes care of us. We couldn’t ask for a better partnership.”***
